Power Company for Elevators and Electromechanical Works is to provide its services in the field
Supply - installation - maintenance of elevators of all types

- Patient and hospital elevators
- Cargo elevators
- All operating systems for elevators from
 - Electric elevator machine room at the top of the well
 - Hydraulic elevator downhole making machine
 - Elevator girls making machine inside the well
- Home elevators (building - villa)s
- Food elevators
- Escalators and escalators

Elevator Geard traction Machineroom

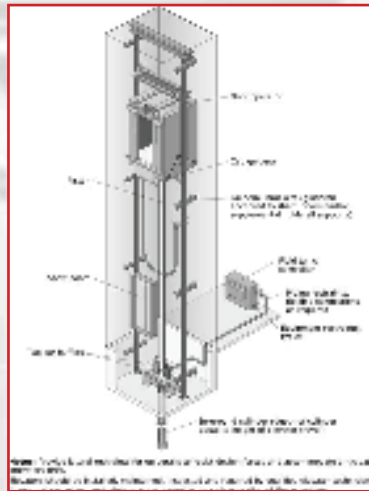

Hydraulic elevator systems are the ideal solution for buildings that are in dire need of dispensing with the upper machine room (top of the well) and hydraulic elevator technology works with oil pressure, in the past few years, many manufacturers have turned to hydraulic elevator technology, so this type of elevator has become smoother in movement and with a high degree of safety, and it has become possible to rely on

Features

- Minimum required civil works
- Dispensing with the traditional machine room at the top of the well
The pump can be placed anywhere near the elevator
- A hole of little depth
- Flexibility in design
- There are no problems with ventilation
- Smooth elevator movement and better performance characterized by smoothness

Hydraulic elevators

Elevators without machine room

Elevator systems without a machine room are the ideal solution for buildings that are in dire need of dispensing with the space of the machine room above the well . This system requires a minimum of vacuum in the well due to the position of the machine above the riser . This model . international specifications has been selected as the best solution according to ENA
:- Features

- Minimum required civil works
- Dispensing with the traditional machine room at the top of the well, as the machine is located inside the well
- A hole of little depth
- The minimum free distance between the top of the serviced floor and the roof of the well
- Flexibility in design
- There are no problems with ventilation
- A small control room on the upper level
- Smooth elevator movement and better performance characterized by smoothness
- less energy than other elevators ٪٨٠-٧٠ Simple energy consumption as it consumes
- It does not need to follow up or change the machine oils as the machine has no gears
- Its speed is higher than that of hydraulic lifts
- dB and this value is much lower than that of other elevators ٥٥ to ٥٠ The noise level is from

Girlless Lifts
